

# ***intallation guide***

## ***the floating bed***

### ***tools required***

**4mm**

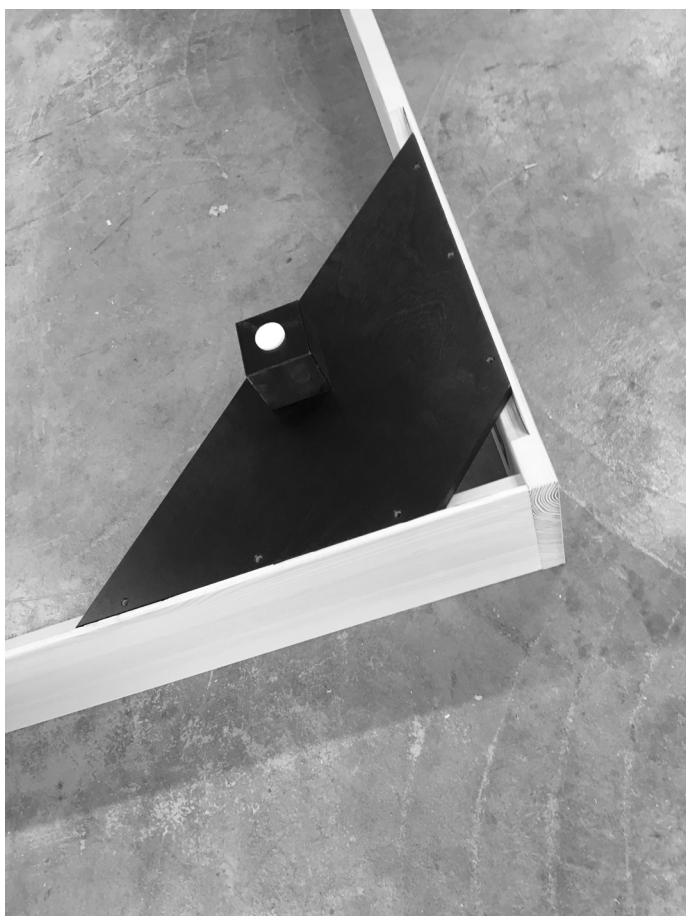

**PZ2**

***start by placing all four planks on the floor  
(upside down)***

***then connect the corners  
and use a hex key to tighten them together***

***place the legs in the corners and use the screws to  
mount them***

***flip the bed frame and place the mattress  
good luck!***
